**Subject:** Oak Creek Forest Restoration Project comment

Gwen,

Thank you for your comments concerning water rights and dust abatement in relation to the Oak Creek Forest Restoration Project.

Any water that will be used to control dust will be supplied by the logging contractor and will not come from on site. The bid package and the signed contract will stipulate that the contractor will need to supply the water from an approved source.

I hope this answer addresses your concerns. Please feel free to contact me if you have additional questions.

Thank you,

Ross Huffman
